## EXPERIENCE

### **Broadnet Teleservices**, Remote — *Design Lead*

SEPTEMBER 2020 - PRESENT

After nearly two decades of life without a dedicated product designer, Broadnet's suite of products was more than ready for a complete rewrite of the codebase and UX. My responsibility includes a ground-up redesign of a multi-million dollar product whose services reach millions of end users per year through dozens of national and multinational clients.

### **Safe2**, Remote — *Design Lead*

MARCH 2020 - JUNE 2020

Given an ethically unparalleled data security protocol, my role required me to create a user experience and interface that satisfies the sudden, vast need to securely track an individual's relative risk to COVID-19 exposure without creating opportunities for third parties to obtain personal data and use it to nefarious ends. Safe2 is currently in the process of rolling out pilot programs to a number of local, national, and global clients, including The American Red Cross.

### **Rayka**, Remote — *Head of Design*

OCTOBER 2018 - DECEMBER 2019

My responsibilities include the direction and execution of all marketing and product design efforts including roadmapping, user testing, user research, wireframing, visual design, benchmarking, and validating. Rayka has a 4.7-star rating from 158 votes in the iOS App Store.

### **Gigster.co**, Remote — *Contract Product Designer*

NOVEMBER 2015 - OCTOBER 2018

After being vetted by the Gigster team, I was welcomed into a small community of designers, where I shipped fourteen early-stage, product design projects with excellent client satisfaction. These products ranged from P2P marketplaces, to admin dashboards, to custom internal software tools.

### **Coolhouse Labs**, Petoskey, MI — *Designer In Residence*

JUNE 2015 - AUGUST 2015

I served on-site during the 2015 summer accelerator program as a design resource to six pre-seed stage tech startups. Responsibilities included MVP product design, branding design, and product strategy.

## EDUCATION

### **Aquinas College**, Grand Rapids, MI — *Bachelor's of Arts, Concentration in Photography*

GRADUATED MAY 2013
